1st October 2004

Ripper Reunion 2004 - Bulletin No 3

We are now definitely over 100 but quite a few folk who have indicated that they will be attending have yet to respond or confirm.

Lots of contact has now been made with at least 5 different branches of the family all of whom have their roots in a very small area of Cornwall. This reunion will present the opportunity to clear up a number of links and perhaps for some provide a lineage back to the 16th century and earlier.

Please continue try to think of any Ripper descendents who still may have been missed in previous mail/email outs or who may not have received a personal verbal invitation from another family member.

If this is the first information you have received and would like to know more or even better attend the reunion and receive whatever documentation is generated out of the weekend please contact us ASAP at the address/email address below.

Ken Ripper from Ware in the UK is putting together a wonderful computer based presentation for the weekend and photos, trees, and histories will be presented by Power-point presentation over the course of the weekend.

The Sale District family history society will be in attendance and will be able to provide a vast array of material on births deaths and marriages for Australia and elsewhere. Computers will be available to enable people to conduct some research from internet and CD over the course of the weekend.

Any trees already done which you would like to share (whether in paper or computer form) can be forwarded to the reunion address as soon as possible to allow time for copying, printing and mounting or putting into power-point form for best presentation over the weekend.

Some accommodation is still available with some family members and some rooms at the Stratford Motel (03) 5145 6500 or cabins at the Stratford "Top Tourist" Caravan Park (03) 5145 6588.

It's still not too late so if you are able please register now and continue to spread the word and the invitation which can be downloaded from the website.
